

DE BEERS TECHNOLOGIES

Raven Single Particle Sorter (Course and Fine)

APPLICATION

Single Particle Sorting of diamondiferous material using laser technology. Depending on feed conditions, the diamond by weight of concentrate produced can be in excess of 95%.

Raven Course machine (covers removed)

Raven Fine machine (covers removed)

FEATURES AND SPECIFICATIONS

- Sealed diamond path with no hang-up or spillage
- Fully automated, hands off
- SCADA interface
- Full maintenance support
- Material flow path is separate from electronics to enhance security during maintenance
- 99% diamond recovery (Raven Course)*
- 98% -4mm and 99% -8mm diamond recovery (Raven Fine)*

**50% diamond by weight feed at correct size ratio*

Throughput Capacity	
Size range (mm)	Feedrate (kg/hr)
Raven Course	
-16 + 8	5
-32 +16	15
Material range	-32mm to +8mm
Raven Fine	
-2 +1	0.25
-4 +2	0.50
-8 +4	0.80
Material range	-8mm to +1mm

BENEFITS

- Self-testing
- Built-in diagnostics
- Secure
